Mission-related information

Mission Capstone Project Title: Unattended attention.

Grand challenge or great opportunity (GCGO): Healthcare, regional integration, and education

Mission statement (*maximum 60 words*): My mission is to build inclusive and ethical socio-economic systems for Sub-Saharan Africa, where small daily decisions and local actions accumulate into sustainable prosperity and well-being.

Narrative

Please write a short narrative of your mission development journey over the course of three years. This could be a summary of the activities that you mention in the table below, with emphasis on the lessons learned and key achievements (*maximum 200 words*).

When I started at the ALU my mission was clear innovate solutions that impact social economic standards of my community through investment awareness and platform to do so, hardly first year my colleague and I were able to prototype this STOKO platform that was intended to fulfill that mission directly, however the universe had another plan eventually after multiple

events participations, resources available, opportunities, challenges we kept meeting along the line, the mission shifted a bit into healthtech where I cofounded MediXR from the on campus hackathon which had personal mission to address shortage of infrastructure to train on scale medical expertise to meet demand to the rising population on African continent on the side note I worked with another team healthtech solution UNESIS AI which intended to address the lack of proper medical care due to the lack of communication in refugees camps from diverse individual who has numerous language background and diagnosing capacity after that the mission stayed on improving the left behind while addressing inherent social community issues which leads to more focused and refined mission of building systems that improve social economic standard while proper drawing insights from small and daily actions bleeding sustainable prosperity.

A List of experiential learning activities in line with the **student mission** attended

(Please delete the example once you have entered your list of activities)

Date/period	Activity (in max. 40 words)	Duration	The organization that hosted the activity	Student's deliverables	Proof of participation (insert link for certificate of participation, email, or reference letter)
